Expanded Regional Collaboration Allocations

Purpose and Methodology

Purpose

This report is the fourth in a series of reports examining national priority related DHS funded activities. *Expanded Regional Collaboration: DHS Funded Activities* highlights major state, urban area, regional and local initiatives designed to Strengthen Expanded Regional Collaboration which are funded with Department of Homeland Security grant programs including the Homeland Security Grant Program (HSGP) and the Urban Area Security Initiative (UASI).

National Priority

Expanded Regional
Collaboration

Methodology

The data described in this report have been reported directly to the Department of Homeland Security Office of Grants and Training by state and local users of the Grants Reporting Tool (GRT) through the submission of their Initial Strategy Implementation Plan (ISIP) and Bi-annual Strategy Implementation Report (BSIR).

The project types listed below in the fiscal years 2004 and 2005 BSIRs from the June 2006 calendar year submission were used to identify projects that align to the national priority: Expanded Regional Collaboration. Previous submissions were used for the District of Columbia (December 2005) and Puerto Rico (June 2005) due to the status of those submissions at the time of this report.

- Establish/enhance regional response teams
- Establish/Enhance emergency plans and procedures to reflect the National Response Plan

All investments in the fiscal year 2006 ISIP submission specifically mapped to the Expanded Regional Collaboration national priority were also identified and detailed in this report.

The project narratives provided on each state and territory detail page were selected from those projects and investments aligned to the types and priority listed above and may represent only a portion of total state or territory funding aligned to Expanded Regional Collaboration related projects and investments.

For more information on the sources as well as specific caveats to the data contained in this report, see the section entitled “Notes and Sources.”

Expanded Regional Collaboration Allocation State Summary

National Expanded Regional Collaboration Funded Activities Allocation Summary by State for Fiscal Years 2004, 2005 and 2006.

State	FY 2004	FY 2005	FY 2006	Total
Alabama	\$4,395,232.42	\$4,809,354.00	\$14,528,025.00	\$23,732,611.42
Alaska	\$0.00	\$236,100.00	\$8,294,137.00	\$8,530,237.00
American Samoa	\$0.00	\$0.00	\$4,695,210.00	\$4,695,210.00
Arizona	\$14,984,407.00	\$255,000.00	\$15,809,296.50	\$31,048,703.50
Arkansas	\$0.00	\$0.00	\$0.00	\$0.00
California	\$83,503,583.78	\$31,502,678.00	\$230,650,605.00	\$345,656,866.78
Colorado	\$9,841,533.61	\$2,713,127.00	\$16,388,744.00	\$28,943,404.61
Connecticut	\$4,780,957.00	\$2,813,987.00	\$10,846,198.00	\$18,441,142.00
Delaware	\$5,339,707.57	\$2,193,406.48	\$10,017,349.50	\$17,550,463.55
District of Columbia	\$2,706,424.00	\$4,683,762.00	\$180,118,619.00	\$187,508,805.00
Florida	\$20,814,752.00	\$16,659,649.00	\$67,821,368.36	\$105,295,769.36
Georgia	\$6,645,259.20	\$2,479,953.00	\$44,406,375.00	\$53,531,587.20

	FY 2006
Colorado	\$100,000.00
New Mexico	\$30,000.00
Utah	\$15,000.00
Total	\$145,000.00

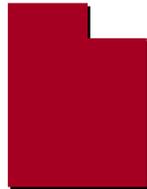

Multi-State Initiative Details

Investment Name: Regional Four Corners Homeland Security Initiative

Participating States: Colorado, New Mexico, Utah

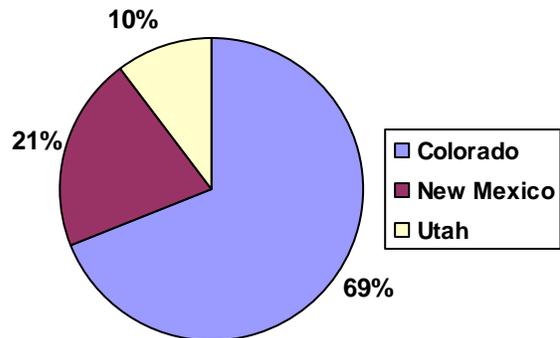

Investment Description:

To develop collaboration when multiple sovereign jurisdictions are co-located in the same area as is the case in the “Four Corners” region where Arizona*, Colorado, New Mexico and Utah converge with the Navajo, Hopi, Ute Mountain Ute, Southern Ute, Jicarilla Apache, and numerous Pueblo Tribal lands. The SAA in each state, Tribes, and US DHS officials have established a collaborative partnership to support planning efforts of an all hazards approach to Homeland Security for the Four Corner States.

The R-4C was created in collaboration with the National Native American Law Enforcement Association (NNALEA) and the National Congress of American Indians (NCAI). Outcomes: The R-4C will establish a holistic planning process resulting in the creation and implementation of standardized operating procedures, consistent response plans, and development of comprehensive training and exercise programs.

Homeland Security Grant Program and UASI Allocations

This model for interstate and intrastate cooperation will serve as a national blueprint for replication in other interested regions throughout the USA.

2006 Funding: \$145,000

* The State of Arizona submitted this investment as part of the FY 2006 Investment Justifications, but did not allocate any funding to this investment in the 2006 Initial Strategy Implementation Plan (ISIP).

Total	\$232,330.00

Multi-State Initiative Details

Investment Name: Northern New England (NNE) MMRS Tri-State Collaborative

Participating States: Maine, New Hampshire, Vermont

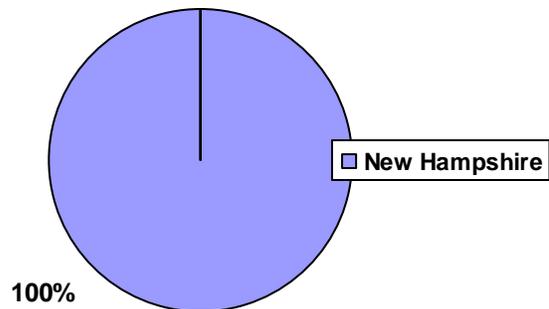

Investment Description:

The Northern New England MMRS (NNE MMRS) functions as a coordinating resource in responding to the health and medical consequences of a weapon of mass destruction attack impacting Maine, New Hampshire, or Vermont. The NNE MMRS also serves as a resource for other mass casualty events or significant outbreaks in the region, including serving as a structure to help local communities take advantage of arriving federal assets.

2006 Funding: \$232,330.00

Note: Metropolitan Medical Response System (MMRS) Funding for this investment is administered wholly by the State of New Hampshire.

	FY 2006
Maryland	\$4,914,424.00
Virginia	\$5,262,500.00
West Virginia	\$1,900,000.00
Total	\$12,076,924.00

Multi-State Initiative Details

Investment Name: Quad State Interoperability Initiative (QSII)

Participating States: Maryland, Virginia, West Virginia

Investment Description:

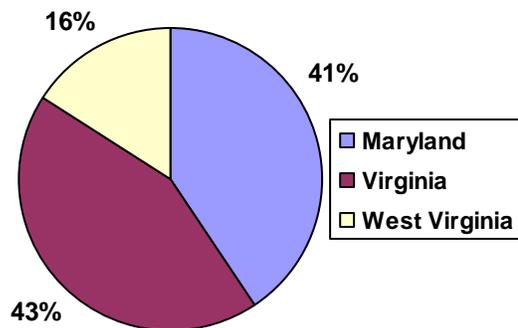

The QSII is a collaborative effort between the states of West Virginia, Virginia, Maryland, and Pennsylvania* to establish a governance structure that will provide organization, planning, and implementation of policies, procedures, and projects to assure voice and data interoperable communications between states. This initiative will establish a governance structure, plan and coordinate a standardized quad state baseline, and implement a limited number of specific tangible projects.

The purpose of this investment is to overcome state boundaries and increase connectivity on the regional level to protect residents within the state, along its borders, and throughout the region including the National Capital Region.

2006 Funding: \$12,076,924.00

* The State of Pennsylvania submitted this investment as part of the FY 2006 Investment Justifications, but did not allocate any funding to this investment in the 2006 Initial Strategy Implementation Plan (ISIP).

	FY 2006
Ohio	\$710,138.96
Total	\$710,138.96

Multi-State Initiative Details

Investment Name: Southwestern Ohio, Southeastern Indiana, Northern Kentucky (SOSINK) Expanded Regional Collaboration

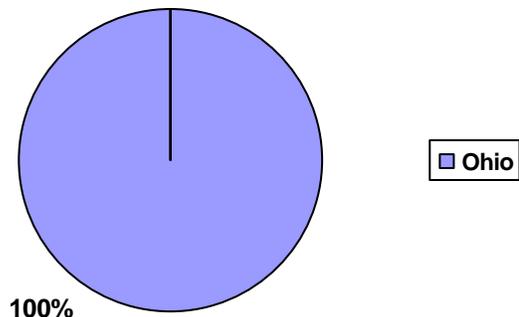

Participating States: Indiana, Kentucky, Ohio

Investment Description:

The purpose of these investments is to strengthen regional and interstate relationships by providing new linkages among Southwestern Ohio-Southeastern Indiana-Northern Kentucky (SOSINK) regional partners to achieve six critical outcomes, which are: to create a Regional Emergency Operations Plan (REOP). This will facilitate partners working off identical plans and enhance efforts for the National Infrastructure Protection Plan (NIPP) implementation; to ensure mutual aid compacts are multidisciplinary and multi-jurisdictional (both intrastate and interstate); to link Emergency Operation Centers (EOCs), via electronic/web-based systems, ensuring real time access to threat and resource availability information.

This will allow the “common picture” of an incident to be regionally shared; to establish regional participation in the design, production and evaluation of training programs and exercises, ensuring a regional approach to response coordination; to ensure regional collaboration and coordination by holding multi-jurisdictional quarterly meetings to oversee implementation of investments and other priorities; and to collaborate with other Ohio UASI regions.

Homeland Security Grant Program and UASI Allocations

2006 Funding: \$710,138.96

Note: Urban Area Security Initiative (UASI) Funding for this investment is administered wholly by the Cincinnati, OH.

Homeland Security

Office of Grants and Training

Southern Border Security

Expanded Regional Collaboration: DHS Funded Activities – Southern Border Security

Homeland Security Grant Program and UASI Allocations	
	FY 2006
Arizona	\$349,931.00
New Mexico	\$200,000.00
Texas	\$5,275,206.64
Total	\$5,825,137.64

Multi-State Initiative Details

Investment Name: Border Security (Southern Border)

Participating States: Arizona, New Mexico, Texas

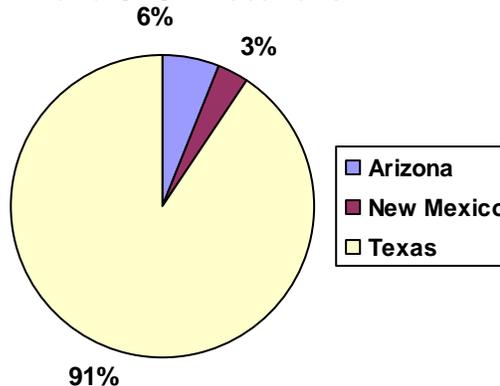

Investment Description:

There is a unique challenge in logistical collaboration, law enforcement capabilities, emergency service cooperation and communication coverage along the U.S./Mexican border that involves multiple states, federal agencies, tribes and other state agencies. New Mexico, Texas, Arizona and California are currently working to enhance border security along the entire border region and develop a U.S./Mexico International Border Infrastructure Protection Plan. New Mexico has utilized emergency funding to enhance public safety agencies, homeland security, and non-traditional efforts in order to fulfill that effort and the outcome has resulted in drastic improvements for the New Mexico counties

participating in this effort as well as excellent communication with our Mexican counterparts. The New Mexico model for interstate, intrastate and international cooperation serves as a national example of what can be accomplished and is now being replicated by other border states. Funding for the border initiatives will continue and enhance the southwest border regional efforts currently underway and will

Homeland Security Grant Program and UASI Allocations

provide for continued collaboration to strengthen our national borders.

Through a thorough Program and Capability Review process conducted by each Region and State Agency, the identified current needs are Capability Assessment, Training and Equipment. A complete North Region Capability Assessment is needed; Additional WMD, radiological, and Advanced Commercial Vehicle Criminal and Terrorist Interdiction Training for first responders, Motor Vehicle Enforcement Officers, and Dept of Agriculture commodity inspectors is required. CBRNE detection equip such as portal detection systems, remote camera/video technology, and individual hand-held sensors will enhance the detection capabilities at the four international POEs along the 350 mile border with Mexico, seven high volume Interstate POEs, and sixteen additional secondary highway POEs along the 1,100 mile interstate border with neighboring states

This investment will: a. “Stand up” a Texas Border Security Coordination Team to coordinate state/local support of Federal border security activities. c. Increase local and state patrols in the border region to increase security, particularly between the ports of entry. d. Provide state and local law enforcement agencies technology to improve the effectiveness of border security operations. Our Program Review and Capability Evaluation identified a need for the State of Texas and local governments along the border to assist the Federal government in strengthening security along the 1,240 mile international border with Mexico. Illegal aliens from Mexico and other countries are crossing the Texas/Mexico border and a wide variety of drugs and dangerous goods are being smuggled across it. This initiative will reduce the level of all criminal activity between ports of entry, including the serious threat that terrorists will exploit the porous border.

2006 Funding: \$5,825,137.64

Expanded Regional Collaboration: DHS Funded Activities – Alabama

Homeland Security Grant Program and UASI Allocations	
Expanded Regional Collaboration	
FY 2004	\$4,395,232.42
FY 2005	\$4,809,354.00
FY 2006	\$14,528,025.00
Total	\$23,732,611.42

Selected Expanded Regional Collaboration Initiatives

Project Title: Establish/enhance regional response teams

Project Description: It has been determined that there is a need for regional prevention and response equipment trailers that would provide needed resources for law enforcement agencies in the event of a terrorist threat or an actual terrorist incident. This funding will be utilized to establish two trailers that will be designed and equipped to provide the technical assistance needed to assist in the detection, prevention and response to CBRNE incidents.

2004 Funding: \$1,558,400.00

Project Title: Enhance Regional Law Enforcement Response Teams

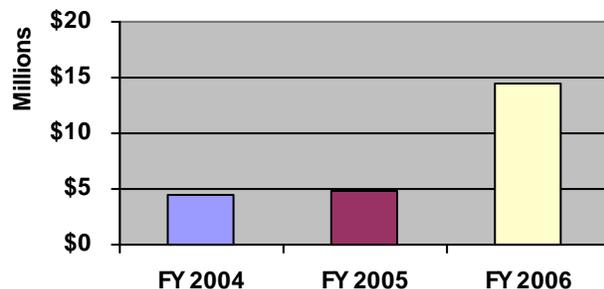

Project Description: Sustain regional law enforcement response team by funding the operations and maintenance costs of the unit. Provide additional training and equipment to regional response team members to enhance their ability to operate in a CBRNE environment.

2005 Funding: \$432,798.00

Investment Name: Maintain and enhance the state’s strong county teams and mutual aid system

Investment Description: The purpose of this Investment is to maintain and enhance our strong local teams; defined as first-responder steering committees in our 68 homeland security jurisdictions (67 counties/1 Native American tribe) and 54 regional mutual aid teams under the Alabama Mutual Aid System (AMAS). FY 2006 HSGP funds will be used to

Homeland Security Grant Program and UASI Allocations

Alabama State Summary

expand these teams; purchase equipment/supplies on a priority-need basis; develop databases of critical infrastructures and homeland security/all-hazards resources; and expand training and exercise programs. Expected outcomes include: (1) expanded local teams to include private industry, schools and universities in all 68 homeland security jurisdictions; (2) more well-equipped, well-informed, and well-trained teams; and (3) statewide participation and solidarity in our homeland security/all-hazards efforts. These outcomes provide the strongest human component of homeland security, and the greatest probability of success for implementing the eight National Priorities.

2005 Funding: \$205,100.00

Investment Name: Alaska Law Enforcement Information Sharing System (ALEISS) Expansion

Investment Description: The purpose of this investment is to expand the Alaska Law Enforcement Information Sharing System (ALEISS), from its current network of 17 subscribers to encompass most local law enforcement agencies in the State. Accomplishment of this initiative will make it possible for the vast majority of local law enforcement agencies to rapidly access information about known or suspected criminals and/or terrorists. ALEISS members use COPLINK® technology to collect, consolidate and share information from existing law enforcement databases across jurisdictions to help solve crimes. It links incompatible law enforcement databases that currently don't "talk to each other" through a secure, intranet-based platform, and allows authorized users to search

Alaska State Summary

using known facts from an ongoing criminal investigation. COPLINK saves substantial time conducting criminal investigations, which translates into cost savings and also allows law enforcement to better direct manpower and keep more feet on the streets.

FY 2006	\$4,695,210.00
Total	\$4,695,210.00

Selected Expanded Regional Collaboration Initiatives

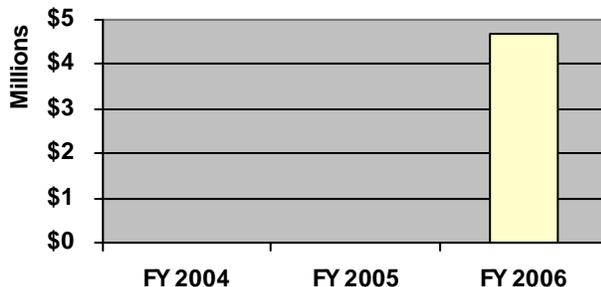

Investment Name: Enhanced Response Capability and Development of Multi-discipline HazMat teams

Investment Description: As a cross-cutting initiative, the development of multi-discipline HazMat teams for response in American Samoa communities were identified as essential assets for response enhancement by the program leadership during the Program and Capability Assessment Review process. CBRNE Detection, Response, and Decontamination objectives, including the priority concerns of Explosive Device Response Operations – in conjunction with established ordinance teams - are inherently linked and are to be addressed through this multi-purpose initiative. Through the combined approach of well trained and outfitted HazMat teams, comprised of multiple disciplines to include fire, health, law enforcement, public works, and customs staffs, gains in efficiency of situational assessments with simultaneous improvements in time-sensitive response coordination, and reduction of the labor resource consumption due to responder limitations based on operational strain factors, this initiative will serve to markedly enhance support capacity for dealing with the core nature of risk-based capabilities throughout American Samoa.

Project Description: Establish/enhance regional response teams

2004 Funding: \$1,791,077.00

Investment Name: Strengthen Information Sharing and Regional Collaboration Capabilities

Investment Description: Investment in these information sharing programs will increase the capability of the central data collection, analysis, dissemination & investigative components of the program. The program achieves positive effect for the entire state of AZ, the western region & the United States. The bulk of this proposal relates to AZ's Intelligence fusion center, the AZ Counter-Terrorism

Homeland Security Grant Program and UASI Allocations

InforCenter (ACTIC). ACTIC is the State's central point for the collection, analysis & dissemination of criminal intelligence info. ACTIC is relied on by the Governor & the state office of homeland security to provide AZ's threat & vulnerability assessment. Its mission is to protect citizens & critical infrastructures of AZ by enhancing intelligence & domestic preparedness operations for all local, state, & federal law enforcement, 1st responder, emergency management & private stakeholder agencies. In addition to the ACTIC, this initiative covers region & agency specific plans & info system enhancements (Dept of Agriculture Animal Tracking system, Criminal Justice Commission's Arrest Capture Data Collection project, equip to link multi-disciplined agencies together via internet, radio, VOIP, enhanced multi-jurisdictional links to ACTIC & other jurisdictions/disciplines).

Selected Expanded Regional Collaboration Initiatives

Project Title: Enhance regional response capabilities through enhanced resources and equipment

Project Description: Identify, procure and deploy enhanced resources and equipment for response to WMD incidents in the Long Beach Urban Area. The focus is on response vehicles for transport, PPE for force protection including SCBA, specialty rescue equipment, field support including mobile kitchen and detection.

2004 Funding: \$5,908,178.00

Project Title: Project M- Establish/enhance regional response teams

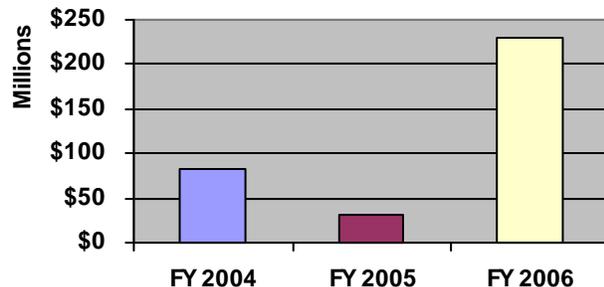

Project Description: Purchase equipment and hire specialized staff for San Francisco and regional partners to provide for better preparedness.

2005 Funding: \$4,249,949.00

Investment Name: Integrated Planning and Expanded Regional Collaboration at Local, State, and Federal Level

Investment Description: The purpose of this investment is to expand regional collaboration by promoting regional planning demonstration projects that could provide a resource for other regions of the State to perform similar planning. The end result of this project will be to have three or four major planning projects across the State related to medical and public health mutual aid plans, regional resource typing

Homeland Security Grant Program and UASI Allocations

and credentialing, mass evacuation, consistent emergency operations plans for a 10-county region, the planning related to a self-sustaining interoperable communications project (user fees fund upgrades and cost of service). The expected outcomes from the investment will be to have regional plans for the regions involved and this investment will set a standard and best-practices guide for performing regional planning related to the specific topic and the region will have the plan that they have created to use as an integrated piece of the overall planning process these outcomes relate directly to the purpose of expanding regional collaboration by performing regional planning. The outcomes will be achieved by regions consisting of many Operational Areas (OA) performing an integrated regional planning project.

Investment Name: Regional Exercise Program

Investment Description: This investment is to sustain and strengthen the Denver UASI regional exercise program. Local and regional multi-jurisdictional exercises are critical tools to evaluate agency proficiency against the standards identified within the Target Capability List (TCL) and the Universal Task List (UTL).

Multi-State Initiative Participant

This state participates in a multi-state regional collaboration initiative. Look for more details in the Multi-State Expanded Regional Collaboration Initiatives Chapter

Homeland Security Grant Program and UASI Allocations

Colorado State Summary

Resources requested will provide the tools for the Denver UASI to evaluate progress against the established metrics in each capability area. The development and/or updating of plans and procedures, as well as the testing of operational readiness, require assessment through exercising. Lastly, the region will use feedback from previous exercises to focus future training, planning, and equipment investments. Once improvement action plans have been implemented, the UASI will exercise the focus capability area again. The regional exercise program will be integrated into both State and local government exercise programs. Exercises will be planned, designed and executed in accordance with the standards outlined in the Homeland Security Exercise Evaluation Program (HSEEP). Collaboration among key stakeholders will determine the primary focus areas ready for exercise.

Project Title: Establish/enhance regional response teams
Project Description: This project will improve the response-readiness of local and regional response teams through the procurement of the training and equipment needed to identify/assess the threat of a WMD event and/or respond and recover from such an event. Activities planned include acquisition of personal protective

equipment, participation by emergency responders in ODP-approved training programs and acquisition of other equipment to aid in a WMD response.

2004 Funding: \$295,087.00

Project Title: Establish/enhance regional response teams

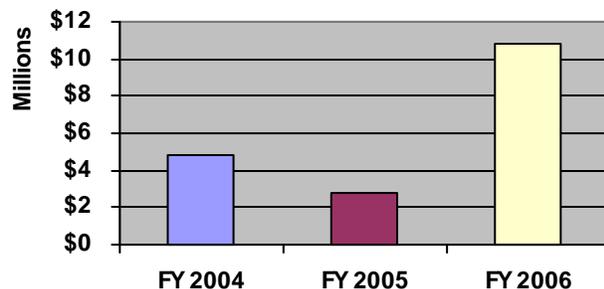

Project Description: Expand and enhance the capabilities of cooperative, regional emergency response teams, including six (6) HazMat teams and three (3) bomb squads.

2005 Funding: \$2,084,793.00

Investment Name: Expanded Regional Collaboration

Investment Description: The purpose of this investment is to continue and further enhance an ambitious initiative to regionalize emergency management functions across the state and further collaborate with the other New England States and New York to maximize resources and leverage those of neighboring states to meet anticipated needs in the event of natural and human

Homeland Security Grant Program and UASI Allocations

caused disasters. This initiative addresses a Major Outcome within the Enhancement Plan to provide Cross Cutting Goals, and a Minor Outcome to enhance Regional Preparedness, both of which were identified by the Emergency Management and Homeland Security Coordinating Council (EMHSCC) at its prioritization meeting. After the successful implementation of this investment, Connecticut will rely on its regionally-based entities to identify emergency planning and preparedness needs, inventory and type resources, train and exercise member towns and mutual aid partners, and target resources to unique solutions in each of the five DEMHS regions. CT has an assigned committee that approves all Interoperable Equipment purchases for conformity with approved DEMHS plans, guidelines. DEMHS Interoperable Communications and Procedures is available for review here at our office.

Homeland Security Grant Program and UASI Allocations

Collaboration for Citizen Protection & Preparedness

Investment Description: The American public has the capability (i.e., the necessary information, knowledge, skills, and abilities) to prevent, protect against, respond to, and recover from all threats and hazards. Requirements to achieve this capability include collaboration among all levels of government, emergency responders, the private sector, civic organizations, faith-based groups, schools, and the public; public education in preparedness, prevention, and mitigation; training for citizens in life saving Cardiopulmonary Resuscitation (CPR), response skills, and surge capacity roles; and citizen participation in exercises, volunteer programs, and surge capacity support. The capability to plan for and immediately execute the safe and effective sheltering-in-place of an at-risk population; or an organized and managed evacuation of the at-risk population to areas of safe refuge in response to a potential or actual dangerous environment, and the safe and organized re-entry of the population.

2004 Funding: \$175,849.00

Project Title: Issue 03 - Continued Build Out of Regional SWAT and EOD Capabilities

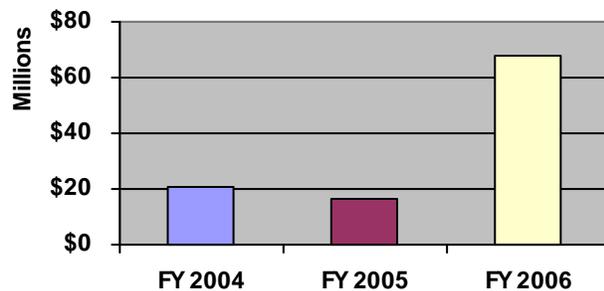

Project Description: Equipping regional emergency response teams is one of Florida’s highest domestic security priorities. •This project enhances the equipment for the first, second and third level regional SWAT and EOD teams, enabling them to respond to and mitigate CBRNE incidents •Equipment for all teams statewide includes: radio interfaces, night vision goggles, enhancements for EOD trailers, portable repeaters, EOD bomb suits, enhancements for EOD robots, and prime movers for the EOD trailers

2005 Funding: \$4,915,800.00

Investment Name: Expanded Regional Collaboration

Investment Description: Regional collaboration is a priority and we have therefore divided the state into seven Regional Domestic Security Task Forces (RDSTF). Each RDSTF will have a variety of individual projects that will support our initiatives. The role of the RDSTF's is to enhance and expand regional collaboration and involves

Homeland Security Grant Program and UASI Allocations

Florida State Summary

leadership from law, fire, EMS, Health, Hospital, emergency management, citizen corps, education, communications etc. We will accomplish this Investment by: 1) Updating and developing plans, protocols and guidelines with all disciplines across the region will enhance our ability to deploy rapidly. This enhanced interdisciplinary planning, training, and exercises will ensure continuity for the region by having planners in each of the seven regions and one each dedicated to the SAA and HSA offices in Tallahassee. 2) Continue to ensure close coordination with all regional partners by conducting regional and statewide planning sessions, identifying and ordering specific CBRNE equipment to support regional response, conducting county/regional exercises and coordinating interdisciplinary training.

Project Title: Develop/Establish/Enhance Regional Response Teams
Project Description: Savannah Fire and Emergency Services will serve as a member of the GSAR team. In order to be fully capable of a regional response the team is purchasing various pneumatic power tools, electrical power tools, Hydraulic tools, saws and breakers, hand tools, rigging equipment, structural tools, hazmat equipment, communications equipment, safety equipment, rope rescue equipment, logistical equipment and

accessories and personal protective equipment.

2004 Funding: \$386,276.00

Project Title: Enhance regional response capability for CBRNE and HazMat events with command vehicle

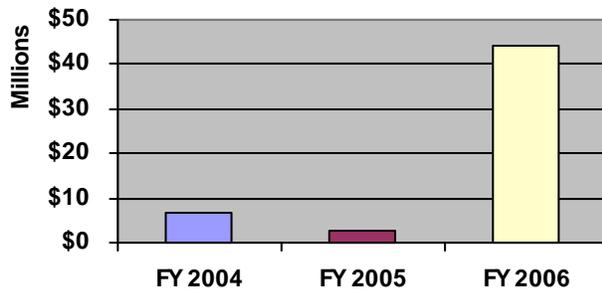

Project Description: Atlanta Fire-Rescue will acquire a command vehicle for regional response to CBRNE and HazMat events.

2005 Funding: \$350,000.00

Investment Name: Regional Collaboration

Investment Description: The primary purpose of the initiative is to improve regional mission areas of prevention, protection, response and recovery capabilities across the State of Georgia through an all-hazards approach to regional collaboration. Enhancing regional collaboration is a high priority to the State and to DHS because of the strong need for

Homeland Security Grant Program and UASI Allocations

this capability as a deterrent to manmade events that may lead to widespread property damage and loss of life. The priority analysis performed by Georgia indicates that the current level of regional collaboration has much-improved over the last several years through the initiation of various programs including required NIMS and NRP compliance, state and local resource inventories, strategic plan preparation, the creation of standardized, web-based statewide emergency operations plans, and the development of mutual aid agreements within the state and participation in interstate agreements such as the Emergency Management Assistance Compact (EMAC). Improving statewide interoperability through several ongoing, DHS-funded programs has also improved regional collaboration in Georgia. Continued effort is required to not only sustain the accomplishments to date, but to enhance this current capability, bringing it to the level that will provide the optimal capability of regional response within the State.

2005 Funding: \$450,899.00

Investment Name: Development, Revision and Coordination of Government-Wide Response Plans/Procedures

Investment Description: This initiative is applicable to all levels of response entities. The approach is focused on enhancement of all-hazards planning and procedure development, to include the areas of WMD/terrorism. Results of the Program and Capability Review clearly identified this Target Capability as being the top program priority. It is identified that through the planning process, all other areas needs and supporting justifications are readily determined. Additionally, this is the critical target capability for assurance the response actions Guam are coordinated, and reflective of capabilities as identified in the state strategy and national priorities. As a baseline target capability, this initiative is directly tied to each of the National Priorities, Critical Target Capabilities, and the current and soon to be revised state strategy. Assessment results identified the primary reason response Plans and Procedures are in need of revision or update is due to a severe shortage of trained and skilled planners from within the response entities, and simultaneously result in the balanced update and revision of the response plans and SOPs.

Project Title: Support HazMat RRT
Project Description: Support HazMat RRT
2005 Funding: \$787,998.43

Investment Name: Regional Collaboration

Investment Description: This investment will increase the State's ability to conduct a coordinated, effective disaster response impacting Idaho counties, surrounding states, Canadian Provinces, and tribal nations. This will be accomplished by entering into mutual aid agreements and memorandums of understanding with all regional partners to maximize limited resources, eliminate duplication of effort, and expedite response to the affected area. We will develop a fully functional pool of ICS trained resources (strike teams, task forces, divisions, groups) capable of local, statewide and regional catastrophic response. The investment supports resource sharing to increase the effectiveness of the EMAC agreement and resources for all-hazard response. We will develop an on-call, division level, type II, all-hazard response capability to be available for statewide and region-wide response within the first 36-48 hours of an incident. We will continue to train and

Homeland Security Grant Program and UASI Allocations

2004 Funding: \$214,013.00

Project Title: Portable Weather Station - Hobart PD & Thermal Imaging Camera - Schneider PD - LTEPP
Project Description: To establish/enhance Lake County's regional response teams.
2005 Funding: \$13,265.80

Investment Name: Teamwork: Enhance coordination between homeland security partners
Investment Description: Enhancing coordination between homeland security partners and integrating all disciplines into the planning process is a pillar of Indiana's homeland security strategy. Indiana's partners include the Counter-Terrorism and Security Council (CTASC) for state and federal agencies, the Indiana Homeland Security Advisory Council (IHSAC) for associations, and District Planning Councils (DPCs) for locals, one for each of the 10 homeland security districts. The primary missions of DPCs are to effectively coordinate a core set of preparedness activities that focus on planning; resource management; training and exercises; and promoting coordination and communication, including mutual aid,

with all levels of governments. Funding to establish and sustain the DPCs will allow them to advance mutual aid agreements, identify the resources and services that may be requested to support events that occur within the given homeland security district, and explain and outline the utilization of NIMS for all mutual aid activities within the given district. Funding will also allow all of these groups to be united through an annual statewide homeland security summit, which will enable additional collaboration and information sharing.

Project Title: Establish/enhance regional response teams
Project Description: Join with other counties in our area to share the purchase of a new HAZ-MAT Trailer for the covered district. This is an asset to the county and is available only by counties uniting to combine finances and support.
2004 Funding: \$6,326.00

Project Title: Develop HazMat response to WMD
Project Description: This funding will be used to develop a regional response capability to HAZMAT response to a WMD/CBRNE event.
2005 Funding: \$263,400.00

Investment Name: Expanded Regional Collaboration
Investment Description: Over the next two years, we will provide a regional collaboration for the State of Iowa that will provide a multi-jurisdictional, multi-disciplinary, multi-hazard approach to building capabilities in prevention, protection, response and recovery across geographic areas. Our funding request is modest and appropriate, and will provide the following outcomes:
 1. Institutionalizing the Regions 2. Regional Facilitator 3. Capability Assessment 4. CAPP 5. COOP/COG 6. EOC Standard Development 7. Mass Casualty/Mass Fatality Planning 8. Regional/District Structure Coordination

Iowa State Summary

9. Communications/Coordination 10. Resource Typing/Identification 11. NIMS Compliance 12. Interoperable Communications 13. GIS Mapping 14. Exercise Facilitation 15. Regional Planning 16. Training Facilitation Outcomes will be achieved through a combination of Regional Facilitator efforts and initiatives begun by the regional leadership.

Selected Expanded Regional Collaboration Initiatives

Project Title: Establish/enhance regional response teams

Project Description: To coordinate a safety response and to ensure all regions of the state are properly covered, Regional HazMat Response Teams were created. These teams are totally funded by the state and are responsible for a statewide HazMat response. These

teams have acquired basic monitoring and detection equipment; however, additional equipment is necessary for the regional response teams, and as funds become available, state agency partners to detect CBRNE vectors.

2004 Funding: \$369,110.00

Project Title: Establish/enhance emergency plans and procedures to reflect NRP

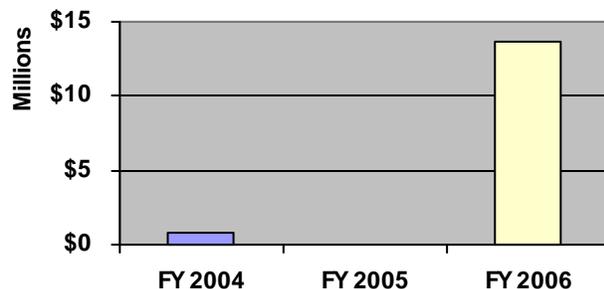

Project Description: Perform a vulnerability and risk analysis

2005 Funding: \$21,135.00

Investment Name: Expanded Regional Collaboration and Regional Exercises

Investment Description: This investment will provide funding for the development and support of seven Regional Councils to promote a regional approach to building capabilities. All 105 counties of the state are divided into these seven regions and coordination efforts will be guided by a membership of council representatives comprised of local first responders, elected officials, emergency management, public

Homeland Security Grant Program and UASI Allocations

health, hospitals, public works, cities of the first class, volunteer or not-for-profit agencies, agriculture, communications, and other homeland security partners. The councils will assess and prioritize current needs and capabilities within their regions and develop strategies and initiatives that will address those needs and any gaps in capability the region has as a whole. Particular attention will be given to regional exercise initiatives that are not currently being met. Exercises are an effective tool for role orientation/clarification and cross-training across disciplines and jurisdictions and have been the most effective means to motivate discussions and assessments on a regional basis. To ensure the long-term success of regionalization, dollars need to be available to each of the regions to plan, develop, conduct, and evaluate various types of exercises on a multi-jurisdictional level. Allocations for these dollars will be managed through a sub-grant application process.

2005 Funding: \$300,000.00

Investment Name: Expanding Mutual Aid Interoperability

Investment Description: With Kentucky and regional partner agencies, Louisville Metro UASI proposes to overhaul and upgrade its 40 plus year-old 450/150 MHz radio infrastructure ensuring the availability of a long-term viable multi-jurisdictional and multi-channel/frequency mutual aid system. This investment corresponds with Louisville’s proposed implementation of a P25-compliant 800MHz digital radio system. The 450/150 MHz system is Louisville’s current public safety radio infrastructure which does not provide sufficient channels and coverage for urban area needs. Outdated analog microwave

Kentucky State Summary

backhaul on 20 tower sites will be replaced with digital high capacity redundant microwave. Links are at maximum capacity unable to support future radio or data technologies. Additional backhaul links are required to connect communications infrastructures. Replicating Kentucky's mutual aid solution, additional interfaces to public safety communications centers will be implemented at the console level via base interface modules. Investment completion will enhance first responder and community safety through uninterrupted and reliable communications, create a long term mutual aid solution, improve coverage, provide a redundant radio system, and establish regional and statewide interoperability at the console level for day-to-day or incident-related operations.

Project Description: Establish and implement a training program for all the first responders within the region to better prepare the parish first responders to respond to a CBRNE event

2004 Funding: \$467,386.00

Project Title: Establish, train, and equip an Urban Search and Rescue Team to assist the State in responding to any terrorism or CBRNE Event.

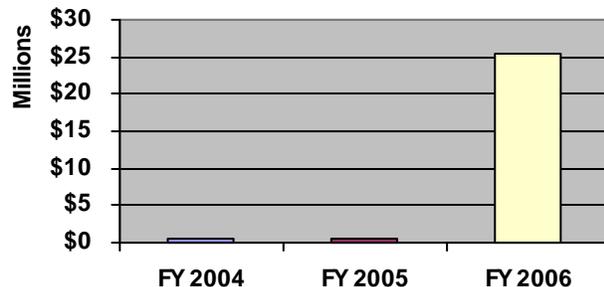

Project Description: GOAL 10: (Response) To establish, train, and equip an Urban Search and Rescue Team to assist the State in responding to any terrorism or CBRNE Event.

2005 Funding: \$165,213.00

Investment Name: Develop all Hazards Regional CBRNE Response Team that can quickly be Coordinated into ICS

Investment Description: Over the next 2 years OHSEP intends to significantly upgrade its regional response capabilities. In order to accomplish this initiative, OHSEP plans on putting in place 3 overarching initiatives: 1) Establish a governance structure that formally recognizes the State's 9 Homeland Security Regions through legislation; 2) Establish Regional Homeland Security Strategies for the State's 7 non-UASI regions to ensure they have an

Homeland Security Grant Program and UASI Allocations

implementation plan and are in line with the State's overall strategy; and 3) to formally establish 9 CBRNE Regional Response teams to ensure a fully capable local CBRNE response is inherent in all of the State's 9 Homeland Security Regions. By introducing and passing legislation we will be able to give the region legal standing and standardized governance. Having a Strategy in place for each of our regions will ensure that all future homeland security dollars are spent as a collaborative effort and standardization will occur to ensure interoperability for each team. Finally, by developing a local CBRNE team for each region it will ensure that when any accident crosses jurisdictional boundaries an existing local team will be immediately available to begin mitigating the response without having to wait on a full State team being deployed.

Investment Name: Program Management and Regional Planning
Investment Description: This Investment supports and enhances an existing program management system that tracks progress and fiscal resources, ensures planning capabilities are placed directly where the need is, and provides for the review and allocation of resources to keep programs and planning efforts effective and on target. It also ensures our homeland security and emergency management programs are supporting all key stakeholders in reaching the National Priorities and state-specific target capabilities. The Program Management System this investment supports provides the essential structure and resources to develop and complete our Program and Capability Review and

Homeland Security Grant Program and UASI Allocations

Maryland State Summary

Enhancement Plan. As described in our Enhancement Plan introductory, this was a comprehensive state-wide resource inventory and assessment process that included local and regional needs-based workshops conducted in all five emergency management regions. The outcomes were used to develop and complete our Enhancement Plan. The initiatives supported by this Investment will continue to strengthen our planning capabilities as well as our ability to coordinate effectively and efficiently. Essentially, it enhances overall regional planning and preparedness coordination and promotes information exchange and situational awareness for emergency management and homeland security leadership. Its ultimate purpose is to coordinate and ensure program interoperability in support of the three Overarching National Priorities.

Project Title: Regional Response Teams
Project Description: To develop and enhance regional response and recovery teams and regional emergency plans, responsible for formalizing plans to effectively prepare for (and respond to) a CBRNE / WMD incident.
2005 Funding: \$295,000.00

Investment Name: Enhancement of Regional and Statewide Preparedness Programs
Investment Description: The purpose of this Investment is to assess current regional capabilities, upgrade the state's Fire Mobilization and Emergency Medical Service Plans and develop regional evacuation plans as well as regional sheltering and mass care capacity. The investment will fund the assessment of each region's current capabilities, current intra- and inter-state mutual aid agreements, the development of regional evacuation plans, identification of special needs populations, establishing regional sheltering plans, regional mass care capabilities, properly equip shelters / mass

care facilities and management of volunteer resources. The goal of this investment is for the state to have viable mutual aid as well as regional evacuation plans that will address needs of affected populations to shelter or leave an at-risk area within an acceptable time frame. In addition to this outcome it will provide viable plans and capacity to shelter and provide mass care for affected populations. These plans will include, but not be limited to, traffic management, emergency notification, resource tracking, volunteer and private sector protocols and interlinking community support.

Selected Expanded Regional Collaboration Initiatives

Project Title: Establish/enhance regional response teams

Project Description: We are planning to purchase equipment that could be used by all Emergency Response Agencies in the county. We would store all equipment in a trailer and have it available to all agencies, i.e.; portable lighting, generators, PPE Level A suits, along with decontamination equipment. All equipment purchased would enhance our capabilities for search

& rescue.

2004 Funding: \$59,340.00

Project Title: Emergency Support Team - Augmentation for RRTN

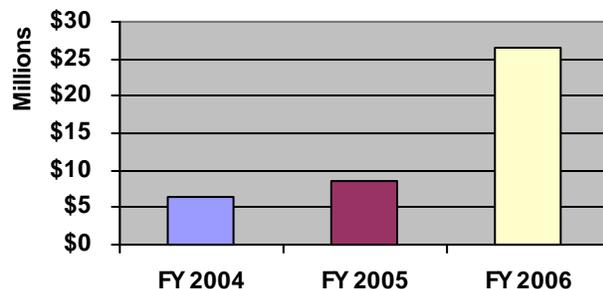

Project Description: The Michigan State Police Bomb Squad and Emergency Support Team have joined forces with our partners to improve the state of Michigan’s ability to respond, mitigate, and recover from the potentially devastating effects of a WMD event. Training, exercising, and equipping each component, both individually and collectively are the foundation elements of this response force and will ensure its successful and continued development to assure a rapid and safe response during a CBRNE incident.

2005 Funding: \$1,287,921.00

Investment Name: Enhance cross-discipline regional responder safety programs

Investment Description: This investment will address the collective regional needs of emergency responders with respect to equipment acquisition and maintenance,

Homeland Security Grant Program and UASI Allocations

Michigan State Summary

cross-agency and cross-discipline exercises, and surveillance and detection activities. Responder safety is a broad term in this sense, and encompasses a broad range of projects and activities and all elements of capability. Funds from this investment will allow emergency response organizations and all disciplines in the urban area to collaborate on projects such as the standardization of equipment and the development of equipment caches within the urban area. Although the capability review revealed that jurisdictions may have other priorities to focus FY 2006 UASI funding on besides equipment procurement, that activity will be directly supported by this investment. Additionally, training, exercising, and planning for deployment of equipment will be funded by this investment.

Project Description: To enhance the training of the Minneapolis Collapsed Structure Rescue Team.

2005 Funding: \$1,000,000.00

Investment Name: Regional Funding for State Homeland Security and Emergency Management Regions

Investment Description: Starting SHSP grant year 2005 Minnesota embarked on a regional approach to funding state homeland security and emergency management initiatives. This has been a very successful approach due to numerous reasons most importantly the need to share resources and look at building strengths and filling gaps through a regional approach. Through our PC & R process

Homeland Security Grant Program and UASI Allocations

Minnesota State Summary

we identified from a programmatic review ""Expanded Regional Collaboration"" as one of the seven National Priorities. This identification provided us a confirmation that funding regions in this way was not only the preferred method, but in fact the proper method of addressing needs. Through the use of regional meetings facilitated by our regional program coordinators, needs are identified and a consensus of needs are identified. Further this process has enhanced mutual aid agreements as well as the development of joint powers and joint use agreements. Provide for planning and personnel costs to implement and manage program. Further to additional personnel will provide more cohesive and responsive support to regional partners in the homeland security regions.

Project Title: Equipment of Regional Hazmat Teams

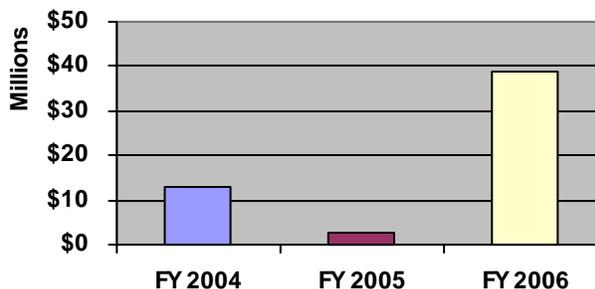

Project Description: To purchase needed equipment for the hazmat teams.

2005 Funding: \$175,000.18

Investment Name: Develop a Regional Critical Infrastructure Program and Enhance Collaboration for Response

Investment Description: A regional critical infrastructure program will be developed to provide the unifying structure for existing critical infrastructure protection efforts in the region. This will be done by preparing a regional critical infrastructure protection plan; enhancing the regional critical incident site management system (CISMS), a database of information on specific critical infrastructure with pre-planning for response to terrorist or other events; the building of partnerships at the regional level with representatives from the 17 sectors outlined in the draft NIPP; piloting a regional surveillance camera

Homeland Security Grant Program and UASI Allocations

Missouri State Summary

server project; and developing a long term risk-reduction program to prioritize protection initiatives in the region. The regional 9-1-1 system will be enhanced to provide for redundancy and eliminate all "single points of failure" that currently exist in the system. The wireline network will be moved to the existing redundant selective routers supporting the wireless system and expand the current T1 network to support all 9-1-1 traffic. The system serves 45 public safety answer points in 9 counties. This investment also includes limited funding for other priority investments for protection of other critical infrastructure after necessary planning has validated the priority nature of these projects.

Investment Name: Strengthening, standardized CBRNE Detection, Response, and Decontamination capabilities

Investment Description: This investment's purpose is to increase the State of New Hampshire's capability to assess a potential CBRNE incident, to respond, manage, and mitigate the effects of such an incident. Through the use of regional Hazardous Materials response teams, this investment will increase the State's the ability to test and identify all likely hazardous substances (WMD/CBRNE) on-site, provide protective clothing and equipment to the

Homeland Security Grant Program and UASI Allocations

New Hampshire State Summary

State's first responders, conduct rescue operations to remove affected victims from the hazardous environment, conduct geographical survey searches of suspected sources or contamination spreads and establish isolation perimeters, contain and fully decontaminate the incident site, including victims, responders and equipment, manage collection of all hazardous substances, and implement standard evidence collection procedures.

Project Title: EMS Task Force Coordinator

Project Description: The EMS Task Force Coordinator is responsible for coordinating the development of the Statewide Emergency Medical Services Task Force. This Task Force combines the State’s many EMS resources from within the volunteer and career Emergency Medical Services, commercial ambulance services, hospital based ALS units and communications centers. This organized approach is similar to programs currently established in fire services and law enforcement agencies and will allow for specially trained EMS team to support an emergency

operation or a preplanned event with a unified EMS response.

2004 Funding: \$160,000.00

Project Title: Project F: Follow the Hazards

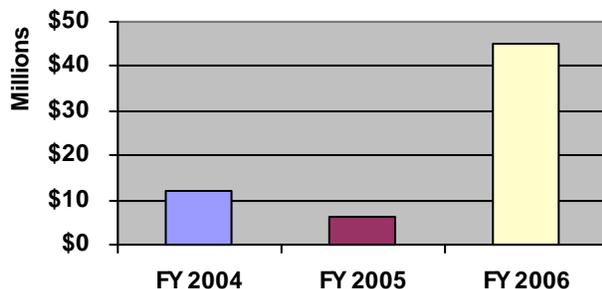

Project Description: Project F: Follow the Hazards

2005 Funding: \$3,837,582.84

Investment Name: Expanded Regional Collaboration Strength

Investment Description: This IJ “Expanding Regionalization” is comprised of three highly interrelated projects. The three projects, identifying inter/intra state regional opportunities, conducting mandatory regional exercises, and supporting a competitive regional grant program, are the components of a cyclic process designed to foster collaborative planning, staffing, equipping, training,

Homeland Security Grant Program and UASI Allocations

exercising, evaluating, and implementing improvement recommendations. Projects are intended to enable us to further mutual aid and assistance compacts, position resources strategically, share resources, and develop partnerships between and within various disciplines, levels of government, and the private sector. First, regional partners will be required to collaboratively identify common problems and develop initiatives to address them in a coordinated, orderly, prioritized, effective, and efficient manner. Secondly, they will conduct full scale or table top exercises to test plans, policies and procedures. Strengths and weaknesses will be identified in all mission areas: prevent, protect, respond, and recover. Finally, they will use exercise improvement action plans as a basis to make future homeland security funding decisions and allocations. This IJ will enable our state to further regionalize, beyond our existing 21 county structure, by dedicating funding to specifically support the cyclic process.

Project Description: To coordinate the preparedness activities of the New York City human services sector to respond to large scale community disasters C886140
2004 Funding: \$100,000.00

Project Title: State Homeland Security Program II-A-5
Project Description: Enhance the technical rescue training capabilities and program offerings statewide. These resource enhancements provide an efficient and effective method by which homeland security funding will directly benefit the local emergency service provider.
2005 Funding: \$144,030.00

Investment Name: Statewide Explosive Device Response Planning, Training, Exercise and Operations Investment

Investment Description: This Investment maintains & expands on work done in previous grant funding cycles to build out the explosive device response operations capability across New York State. All intelligence & information to date from numerous sources indicate that bombs were, are, & will continue to be the weapon of choice for terrorist groups in the world. This Investment will utilize up to \$7,000,000 of grant funding to build on the response capability of the 103 state &

New York State Summary

local FBI certified bomb technicians working in 13 FBI certified bomb squads that were created in the pre-9/11 environment primarily with state & local funding sources. Gaps identified during a meeting in February 2006 with the bomb squad technician stakeholder community will be filled to enhance capabilities & hopefully allow these bomb squads (resources) to be typed under NIMS resource typing guidelines to a higher level of capability after this funding has been properly applied. This Investment will allow funding to be used for planning, training, exercise, equipment, & organizational purposes, since these items have been defined in the federal eligibility requirements. This stakeholder group may also be used to move forward a state / local radiation interdiction effort with the DNDO within DHS.

Project Title: Benson County - Planning

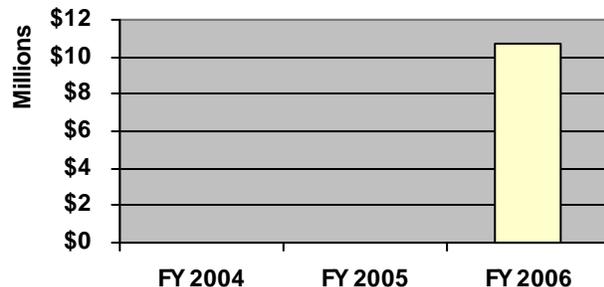

Project Description: Implementing and adopting NIMS program into existing incident management and LEOP to ensure alignment with the NRP.

2005 Funding: \$5,000.00

Investment Name: Regional Collaboration

Investment Description: The purpose of this investment is to maintain and expand Homeland Security regional collaboration and increase stakeholder involvement. The investment sustains ongoing collaboration efforts through staff retention and program allocation. It strengthens Homeland Security program with local jurisdictions, federal partners, in state stakeholders, adjoining state intelligence fusion centers, and Canadian Provinces. Furtherance of this investment will strengthen our relationship with Homeland Security Partners and foster further integration of program. The investment specifically fosters first responder and community collaboration through the formalized Department of Emergency Services Advisory Committee. The eleven member committee represents local law, public health, emergency medical, communications, information technology, private citizens, counties, cities, state law enforcement and emergency management. This investment provides the resources necessary to continue valuable program review. The investment also keys fiscal funding to local jurisdictions for regional meetings in the formulation of mutual aid

Homeland Security Grant Program and UASI Allocations

Project Title: Regional Response Teams
Project Description: Procure equipment and train the regional response teams
2005 Funding: \$773,415.00

Investment Name: Development, Revision, and Coordination of CNMI Response Plans and Procedures

Investment Description: This initiative is applicable to all levels of response entities in the CNMI. The approach is focused on enhancement of all-hazards planning and procedure development, to include the areas of WMD/terrorism. Results of the Program and Capability Review clearly identified this Target Capability as being the top program priority. It is identified that through the planning process, all other areas needs and supporting justifications are readily determined. Additionally, this is the critical target capability for assurance the response actions of the CNMI jurisdictions are coordinated, and reflective of capabilities as identified in the state strategy and national priorities.

Homeland Security Grant Program and UASI Allocations

As a base line target capability, this initiative is directly tied to each of the National Priorities, Critical Target Capabilities, and the current and soon to be revised state strategy. Assessment results identified the primary reason CNMI's response Plans and Procedures are in need of revision or update is due to a severe shortage of trained and skilled planners. This initiative would support local talent development for generation of skilled planners from within the response entities, and simultaneously result in the balanced update and revision of the response plans and SOPs on all islands and the central government.

Project Title: FY05 Regional USAR Homeland Security Initiative

Project Description: Develop and enhance USAR Team for response in the SW Region

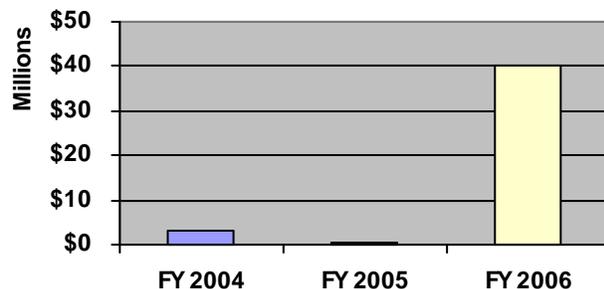

2005 Funding: \$72,706.00

Investment Name: Ensure Statewide Regional Collaboration Regardless of Jurisdiction or Discipline

Investment Description: This investment purpose addresses the State's priority needs and capitalizes on the strengths of current efforts to expand regional collaboration.

The end result of the FY 2006 HSGP funding requested will serve to expand numerous outcomes which are already underway, such as: 1. Locating capabilities strategically in order to maximize coverage of our population and our critical infrastructure and key assets, 2. Further mutual aid partnerships, State fire and LE Response Plans, and capability building; 3. Expand coordination in order to conduct more training and exercise in this arena 4.

Homeland Security Grant Program and UASI Allocations

Ohio State Summary

Better coordinate response activities for timeliness and effectiveness. Significant achievements have been recorded, such as the development of the Ohio Response System (ORS) and the Regional Medical Response System (RMRS). With HSGP funds, outcomes will be achieved by developing response operations, planning and coordination at the regional level and efforts will allow for further regional and statewide coordination, education, training and exercises of the plans and procedures.

Project Description: Finalize purchases of regional response trailers
2005 Funding: \$693,624.00

Investment Name: Regional Response System Training/Exercise/Equipment Sustainment/Expand
Investment Description: The State of Oklahoma is in the final stages of implementing an all-hazard Regional and Statewide Response System with tiered levels of capability and interoperability of equipment and trained responders. The system will allow for the coordination of a local, regional and/or statewide response to WMD/CBRNE, Technical Rescue or Agriculture event with multi-disciplinary, multi-jurisdictional teams from across the state. In order for this system to continue and expand there must be sustainment funding for training, exercises, replacement of expired and expended supplies used during training and actual events as well as maintenance, replacement of existing

Oklahoma State Summary

equipment, and purchase of additional equipment as additional units are added. The HSGP FY 2006 funding for this investment will increase response units and the number of responders trained in incident management, management of WMD/Hazardous materials incident, Rescue Operations and other courses needed to educate Oklahoma responders and provide the technical skills necessary to respond and manage a WMD/CBRNE incident. Funding for this investment will aid in developing a training and equipment maintenance program to continue the system.

Project Title: NIMS/NRP Implementation

Project Description: 1.Establish a Homeland Security Board within each region. 2.Participate in NIMS resource typing initiative lead by PREMA in coordination with the SAA. 3.Complete the NIMS Awareness Course: “National Incident Management System, An Introduction” IS 700. 4.Complete the NRP Awareness Course: “National Response Plan, An Introduction” IS 800. 5.Complete ICS 100 and 200 Training. 6.Establish legislation, executive orders, resolutions, or ordinances to formally adopt NIMS. 7.Establish a NIMS baseline by determining which NIMS requirements are already satisfied. 8.Establish a timeframe and develop a strategy for full NIMS implementation. States and local entities are encouraged to achieve full NIMS implementation during FY05. 9.Institutionalize the use of the ICS. State, territorial, and local entities that are not already using ICS, must institutionalize the use of ICS (consistent with the concepts and principles taught by DHS) across the entire response system. 10.Implement the NRP.

2005 Funding: \$41,077.00

Homeland Security Grant Program and UASI Allocations

Investment Name: Develop and Build a Puerto Rico Homeland Security Training Center

Investment Description: Effective and efficient training is key to a timely response especially when it involves the potential loss of life and property. This investment is designed to enhance overall response capability through the establishment of an on-island Homeland Security Training Center. Its purpose is to establish a viable and integrated framework that consolidates the requirements of 54 State-level agencies, 78 municipalities, the private sector and the public for the protection, prevention, response and recovery of Puerto Rico during an all-hazards event. It will be Spanish language-based and focus on response activities unique to an island situation. It will reduce travel costs to the United States mainland for current training, minimize the lost response capability when first responders are off-island and will greatly expand the ability to conduct outreach and train a larger segment of the general public. It will also allow for greater attendance by students that would otherwise, not be able to attend a stateside-based course due to Spanish language limitations. Finally, it will link training and exercises because they can be conducted in parallel where now training is conducted in the United States and exercises are conducted in Puerto Rico.

Project Title: Sustain regional decontamination teams.

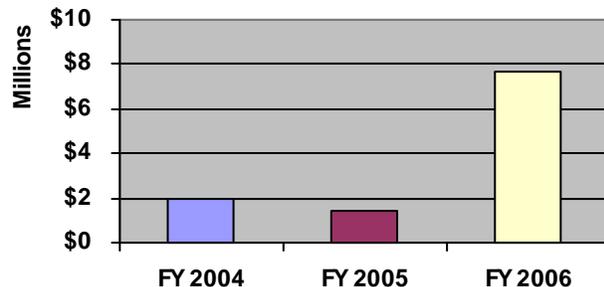

Project Description: Sustain regional response teams through the purchase and maintenance of equipment, training and exercises.

2005 Funding: \$160,000.00

Investment Name: Planning

Investment Description: The purpose of this Investment is to enhance and develop a statewide, regional based planning capability. This would be accomplished through the hiring of one state level and six regional level planners that would write plans, procedures and protocols that would focus on catastrophic incidents that result in extraordinary levels of mass casualties, damage, or disruption severely affecting the population, infrastructure, environment, economy, national morale, and/or government functions. The plans would work to overcome incidents that almost immediately exceed resources normally available to the state and local authorities through the use of statewide regional and interstate aid, to include Massachusetts and Connecticut. The planning would utilize a common, shared

Homeland Security Grant Program and UASI Allocations

approach and focus on such components as evacuation, reception and shelter (including a focus on at-risk population), logistics and resource management, feeding, mass care, debris management and the use of regional Emergency Operation Centers. The one state and six regional planners would work together to insure coordination and cohesion for all plans and to facilitate effective initial response and accelerated Federal/national assistance and inter/intra state mutual aid.

Project Description: Improve State, Regional, and local capabilities to respond to terrorist attacks employing chemical, biological, radiological, nuclear or explosive devices, infectious disease outbreaks, public health threats and other emergencies.
2005 Funding: \$6,000.00

Investment Name: Enhanced Regional Collaboration and Capability Investments
Investment Description: This investment focuses on the development and support of a planning cell with the purpose of: identifying & prioritizing capability gaps for all TCL capabilities; and making plans to address the gaps, while obtaining concurrence from key entities to realize the plans. Expected outcomes in FY06 include the development of local, regional and State plans identifying regional collaboration & provision of mutual aid opportunities, and / or investments to address gaps. The planning group will develop assessment and prioritization tools; analyze risk; and provide reports / plans to help the State,

regional and local committees in the decision making processes. This strategic planning group will play a key role in developing and coordinating SC's new Homeland Security State Strategy due 30 Sep. Its purpose will be achieved as it provides tools and works to leverage the expertise and abilities of SC's 4 Regional Counter Terrorism Coordinating Councils (CTCC), the State's CTCC, and 46 county Needs Assessment Committees--to assess & build capabilities, rewrite the State's strategy, and move forward with it's implementation--consistent with the 3 overarching and 5 capability specific national priorities, but to include all 37 targeted capabilities listed in the TCL.

No projects were indicated on either the 2004 or 2005 BSIR (June 06) for the State of South Dakota as having been aligned to the following project types:

- Establish/enhance regional response teams
- Establish/Enhance emergency plans and procedures to reflect the National Response Plan

Investment Name: Improve and Standardize First Responder Response Capabilities

Investment Description: The First Responder Capabilities investment will support the State Hazmat teams and other state and local first responder agencies within South Dakota. Funding this investment will provide South Dakota with improved Hazmat detection and response capabilities, improved search and rescue, and other response capabilities for local fire departments, law enforcement agencies, and emergency medical services. This investment will provide the State with four regional hazmat departments that have a least two hazmat response team capabilities. Once equipment is procured, each department will have biological detection capabilities and have standardized communications. In addition, this investment includes the training, exercise and planning needs to maintain and expand ICS training, exercise funding requests at both the State and local level and includes M & A costs to sustain the Office of Emergency Managements personnel. In addition to these requests Citizen Corp funding as been allocated to fulfill equipment, training, and exercise

Project Title: Establish/enhance regional response teams

Project Description: Enhance our response capabilities throughout District 3 and establish a fully trained and equipped regional CBRNE Team with USAR capabilities able to respond anywhere in District. Develop Level II HAZMAT response team with CBRNE Capability to provide regional response and Support capability under a regional CBRNE response authority. Acquire advanced CBRNE detection and analytical equipment for use in support of the regional CBRNE Team.

2004 Funding: \$575,000.00

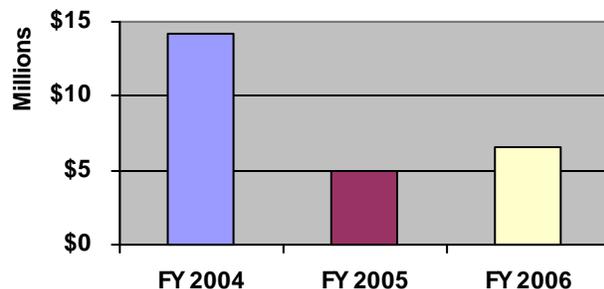

Project Title: B - District - CBRNE

Project Description: To further enhance The Greeneville/Greene County Haz-Mat Team and the establishment of the regional CBRNE Team: Operational and Search and Rescue to equip the Haz-Mat Team and also non-profit agencies (Rescue Squad) who offer assistance to the team during incidents. Power Equipment: A generator is needed for electrical back-up and also for sheltering purposes. Incident Response Vehicle: Funds to be used for purchasing a new Haz-Mat response vehicle to replace an older model vehicle. Decontamination: Purchase of equipment to ensure proper decontamination procedures for citizens and response personnel. PPE: Gear bags for Haz-Mat Team personnel. Training: To ensure that Haz-Mat personnel have continual education.

2005 Funding: \$62,621.13

Investment Name: Planning

Homeland Security Grant Program and UASI Allocations

Investment Description: The Memphis Urban Area Working Group (MUAWG) will coordinate an ongoing planning process for personnel from all disciplines (fire, law enforcement, public health, EMS, EMA, public safety communications, agriculture, public works, governmental/administrative) throughout the Memphis Urban Area to ensure effective response to and recovery from all-hazards events. In addition, the MUAWG will develop a Continuity of Government template that will enable all jurisdictions within the Memphis Urban Area to establish plans for command and control of response, recovery operations and the restoration of critical and essential services. This investment will result in tangible outcomes for the Memphis Urban Area, including but not limited to: The coordination of evacuation plans with surrounding counties to ensure adequate locations/facilities for evacuees; Continuity of government plans for all jurisdictions within the Memphis Urban Area; Better identification of special needs populations and better planning for their evacuation, sheltering, and possible special medical care; Mutual aid agreements among and between the three states (Arkansas, Mississippi, and Tennessee) that encompass the Memphis Urban Area to ensure an automatic and seamless emergency response; The installation of an incident management program such as WEBEOC in each EMA/EOC.

supervisors across multiple disciplines, including 95 radios and 1500 mask amplifiers for fire personnel. Interoperable communications for Intercontinental Airport, along with 4 vehicles and medical supplies for quick response.

2005 Funding: \$4,339,643.00

Investment Name: Enhancing State, Regional, & Local Emergency Planning

Investment Description: This investment is intended to enhance homeland security planning at the state, regional, urban area, and local level. The State's Program & Capability Review identified significant needs for new state, local, regional and urban area homeland security planning to meet recent state and Federal requirements, and major updates to existing all-hazards emergency plans and annexes and specialized planning documents at the state, regional, and local level. The investment will provide funding: 1. For the state's 254 counties and 1,256 cities to upgrade existing plans to incorporate lessons learned in disasters and exercises and new state and Federal requirements, 2. For the State's 24 regions to carry out new state and federal homeland security planning requirements. 3. For the State to update plans to incorporate lessons learned from recent disasters, major exercises, and plan reviews and complete additional state and Federal homeland security planning requirements.

Project Description: Develop and implement a comprehensive and coordinated regional response effort through planning, training, exercise and the procurement of necessary equipment.

2005 Funding: \$9,510,127.62

Investment Name: State-wide Comprehensive Preparedness Initiative

Investment Description: Utah's State-wide Comprehensive Preparedness Initiative (CPI) is a process to ensure that the preparedness efforts of the state and its local partners are integrated across all disciplines and levels of government, including Utah's seven Homeland Security Regions. The process will ensure that state and local jurisdictions have the plans, training, and exercise experience in place to effectively and efficiently respond to a man-made or natural catastrophic event. Utah recently completed its baseline

Homeland Security Grant Program and UASI Allocations

Utah State Summary

EMAP assessment and both Phase One and Phase Two of the DHS National Plan Review. These processes identified strengths, and various weaknesses that must be addressed to ensure Utah has the capability to effectively respond to a catastrophic event. The importance of this initiative is reinforced by the fact that more than half of Utah's population lives along the Wasatch Fault, a fault system that is more than 75 miles long running north-south through the Salt Lake Valley. According to HAZUS data provided by DHS, a 7.0 earthquake here would result in more than 5,000 fatalities, 65,000 injuries, loss of more than 75% of our hospitals and a \$38B economic impact. In 2005, Utah recorded 745 earthquakes, further emphasizing the importance of a state-wide CPI

Investment Name: Strengthen the State's Capability to Respond to a CBRNE Event

Investment Description: Continue planning, training and equipping resources that VT has accomplished during the past 5 years to strengthen our capability to detect and respond to CBRNE events. This capability includes the planning, detection, response and decontamination of CBRNE events. The state's 4 Public Safety Districts (PSD) will be trained and equipped to respond to CBRNE events through this enhanced program. During the next 2 years VT expects to equip and train specialized state and regional teams to a level that will allow for the rapid and efficient response to CBRNE events. VT will enhance its Bomb and SWAT teams into a Type 2 and 3 capabilities respectfully. We expect to enhance local and state CBRNE response and Mass Casualty (MCI) response capability with additional equipment and training that will bring teams to operational and technical

Total	\$18,818,311.11

Selected Expanded Regional Collaboration Initiatives

Project Title: Enhance Regional Response Teams

Project Description: SHSP funds will be used to purchase 10 PPE and related training sets (\$3,999.75) and

communications equipment (bullhorns - \$648.25) to be used at the regional community hospital in the event of a bioterror action or other hazardous event. An additional \$13,680 was allocated for the CERT team and was used as follows: \$4,483 for emergency response and first aid supplies; \$5,350 for an emergency response trailer; \$1,595.67 for looper tubes and traffic barrier tape; and \$2,251.33 for CERT Team emergency response kits. CCP funds were also used for the CERT team and were expended as follows: \$1,000 for contractual services (recharging of fire extinguishers for classes); \$6,700 for equipment (CERT kits, vests, hard hats, gloves, masks, flashlights, goggles, backpacks, triage tape, ID badges, table top exercise supplies, etc.); \$5300 for supplies and other expenses (printing of training manuals, advertisement of program, postage, team shirts, etc.)

2004 Funding: \$31,328.00

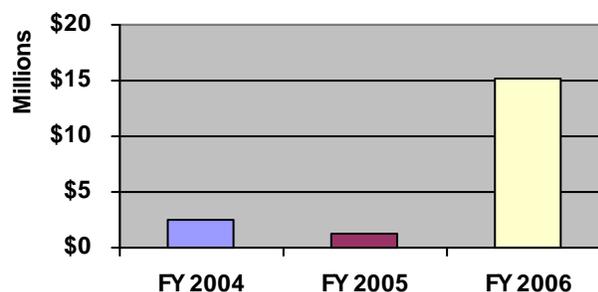

Project Title: Enhance Regional Response Teams

Project Description: This project will continue to build a regional response capability in accordance with the Commonwealth of Virginia State Strategy Goal #5 by purchasing additional

Multi-State Initiative Participant

This state participates in a multi-state regional collaboration initiative. Look for more details in the Multi-State Expanded Regional Collaboration Initiatives Chapter

Homeland Security Grant Program and UASI Allocations

equipment for our Roanoke/Roanoke County Technical Rescue Team. The Commonwealth of Virginia has designated our team as one of the State's regional technical rescue teams to respond to natural and man-made disasters. Currently, team members must utilize their structural or wild land firefighting gear while responding. This type of gear does not offer full protection for the team members. In addition, these rescue situations can result in the responder becoming dehydrated. This project would also purchase individual personal hydration systems for all personnel that respond to these types of incidents. The addition of this equipment to our existing unit would provide for the safety and health of our responders while utilizing their expertise on incidents, locally and on a State level.

2005 Funding: \$35,000.00

Investment Name: State, Regional, and Local Planning

Investment Description: This Investment proposes four integrated activities: 1. Using the expertise of state and local emergency management planners, to identify appropriate planning processes and standards to be used throughout Virginia, and deliver this information to local governments through a contractor. Jurisdictions receiving grant funding would agree to meet these minimum standards approved by the Department of Emergency Management (VDEM). 2. Provide local and regional emergency management planning support through the recruitment and hiring of three regional planners and three regional emergency management trainers to support all seven regions. 3. Recruit and hire one Continuity of Operations planner and the services of a contractor to improve COOP planning in Virginia. 4. Establish a high-level committee as a forum to institutionalize NIMS and NRP implementation.

Project Description: Acquire detection, decontamination, personal protective equipment and resources that enhance first responder's capabilities to respond to Weapons of Mass Destruction (WMD) incidents at the WMD Operations level.

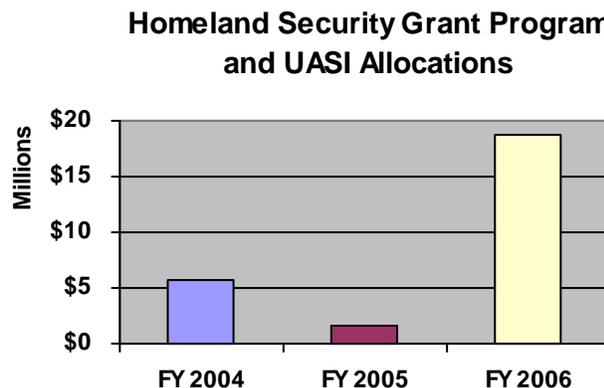

2004 Funding: \$385,579.00

Project Title: Establish/enhance regional response teams.

Project Description: Provide personal protection and decontamination equipment to health care providers.

2005 Funding: \$22,408.00

Investment Name: Enhance Regional Collaboration and Sustain Existing Regional Programs
Investment Description: Washington State has 9 Homeland Security Regions, comprised of one or more counties, which mirror the CDC/HRSA Bio-Terrorism/ Hospital Preparedness Regions. This structure was created in 2002 to encourage collaboration, communication, mutual aid, resource sharing, and economies of scale. Success is due largely in part to the regional planning activities and the establishment of regional councils. Each Region meets monthly, and all 9 regions meet together monthly with the SAA to develop plans, strategies, share best practices, and refine procedures to lessen

administrative requirements and maximize limited funding. The Regions assist jurisdictions/disciplines/special purpose districts/tribes to minimize duplication of effort and support jurisdictions in planning, response and recovery efforts. This project sustains the regional structure, SAA coordination requirements, and assists Regions to execute homeland security requirements while preparing for all-hazard threats. This Investment primarily supports ongoing planning and coordination efforts, yet also supports ongoing training, exercise and equipment activities to assist integration beyond county borders.

Selected Expanded Regional Collaboration Initiatives

Project Title: EOC
Project Description: Enhance the EOC
2004 Funding: \$49,500.00

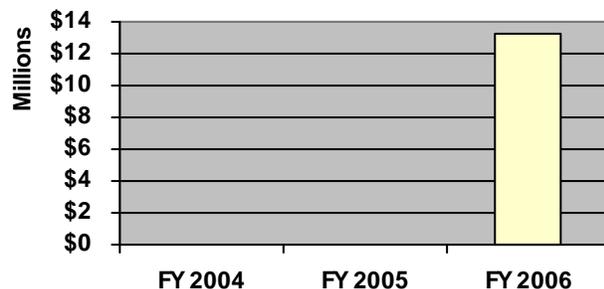

Investment Name: Respond to a Mass Migration from the National Capital Region

Investment Description: In the event of a major terrorist event in the National Capital Region, a massive uncontrolled evacuation of the nation’s fourth largest metropolitan area would likely occur. Similar evacuation responses in neighboring urban areas would channel large numbers of these evacuees into WV. To bring order out of chaos and provide care to the evacuees will require close coordination with neighboring states, among state and local officials, and with emergency responders at all levels. Transportation routes must remain clear and unfettered, medical and humanitarian supplies and assets must be pre-positioned and able to be put in place quickly. Temporary shelters, fuel, and food will be needed on a massive scale. While some State preparedness exists, there is still a lot to be done to prepare for a human migration of such scale. Among the many concerns, it is estimated that over 700,000 beds will be needed along with medical care and the wide spectrum of humanitarian needs. A plan with the requisite resources to implement it will ensure that mass migration can be handled

Project Title: Establish/enhance regional response teams
Project Description: Enhance the capability of emergency responders, specialty teams, and support providers to respond to CBRNE terrorist attacks.
2005 Funding: \$1,155,000.00

Investment Name: Establish Regional Homeland Security Public and Private Partnerships
Investment Description: This investment will initially establish seven public and private partnerships in key urban areas in each region of the state, and will later expand to twelve partnerships. The partnerships will bring together stakeholders who share a community of interest to identify mutual concerns and appropriate cost-effective policy and technology solutions that will enhance each region’s capabilities to mitigate risks and respond to and recover from catastrophic incidents. The partnerships will have defined membership structures and missions, and will meet regularly to set goals, provide guidance, coordinate and plan prevention, response, and recovery activities for the region. The partnerships will collaborate on risk assessments and planning, infrastructure

protection, response planning, information sharing protocols, development and sustainment of volunteer and community preparedness programs, and joint training and exercising opportunities. The partnerships will interface with state and federal public safety agencies where necessary to implement state and federal programs and priorities. The investment proposes to further expand the program in the future through the addition of five new partnerships.

Grant Programs Included in this report:

Citizen Corps Program (CCP), Law Enforcement Terrorism Prevention Program (LETPP), State Homeland Security Program (SHSP), Urban Area Security Initiative (UASI), Transit Security Program (TSP), Emergency Management Performance Grant (EMPG), Metropolitan Medical Response System (MMRS), Buffer Zone Protection Program (BZPP), and Transit Security Grant Program (TSGP).

Project Types:

The projects from fiscal years 2004 and 2005 described in this report are selected from those that specifically are aligned to the projects types listed below.

- Establish/enhance regional response teams
- Establish/Enhance emergency plans and procedures to reflect the National Response Plan

National Priorities:

The investments from fiscal year 2006 described in this report are selected from those that specifically are aligned to the national priority listed below.

- Expanded Regional Collaboration

Methodology Caveats

Note that due to the differences in methodology used to collect fiscal year 2006 data versus fiscal years 2004 and 2005 data regarding national priority alignment, it may be difficult to draw direct comparisons from 2006 to 2004 and 2005.

Investments selected for the Multi-State Expanded Regional Collaboration Initiatives do not include UASI specific investments for urban areas that cross state borders. Additionally, these investments represent only a selection of multi-state investments and may not fully represent the all multi-state investments.
